

Tamas Siklosi

Senior BI Developer

tamassiklosi@outlook.com

Profile

As of now, I have 7 years of BI development under my belt. I have worked with many different clients, developing solutions and solving problems in Microsoft Power BI and Tableau across different business domains.

For me, business data is always intriguing. I made good use of my financial and data analysis knowledge on my previous projects, since I am investing in international stocks for over 12 years.

Design is part of my job, I focus on delivering a look and feel for the product that drives the attention to the key areas. I keep up with recent technologies and trends.

Skills

BI Front-End	ETL	Data Science & Engineering
Over 3 years of experience developing with Microsoft Power BI, including its ecosystem, administration, and customization. Convinced of Power BI's immense potential.	I have adequate experience in report automation from relational databases and DWHs. I'm familiar both on-premises and cloud platforms like Snowflake, Azure and Hadoop.	When my time allows I continue my demo projects, experimenting with Python. The areas which I'm most interested in are Web Scraping, Custom Visualizations and Predictive Analytics.

Tools

Power BI	SQL	Pandas
Tableau	Snowflake	Scikit-learn
Cognos	Azure Data Factory	Matplotlib
Adobe Analytics	Azure Databricks	Plotly
Google Analytics	Alteryx	Scrapy

Other Skills

DAX	Data Modeling	CSS
Power Query	Git	d3

Business Domains	eCommerce	Wealth Management	Capital Markets
	FMCG	Retail	Insurance

Career History

EPAM Systems - Senior BI Developer - Amsterdam

~3 years, 2022 - Present

BI development, Data Analysis and Consultancy are my main focus areas with the above-mentioned BI tools, with additional ETL and Front-End development. EPAM's company culture helps me to gain experience with the latest technologies and use them on various projects.

My position allows me to work on-site in the Randstad area.

I had the opportunity to work for NIKE as a Senior BI Developer, Data Modeler and Senior Data Analyst. In 3 different teams in the EMEA HQ.

My achievements:

- Participated in three successful projects as key Developer
- Developed and distributed dashboards for a key financial stakeholder audience of 200+
- End-to-end created a reporting architecture within an internal tool for vendor invoicing, enabling data extraction and analysis for business users using Tableau and Power BI

EPAM Systems - BI Developer - Budapest

4.5 years, 2017 - 2022

Promoted twice within 4.5 years, culminating in a relocation to the Netherlands. Demonstrated skills through projects with leading companies like Coca Cola, Louis Dreyfus Company, Royal Mail Group, Liberty Global Services, Howden Group and received stellar feedback.

Morgan Stanley - Data Analyst

2017

EIT Health Rare Cancer Summer School on Medical Innovation

2016

GE Healthcare - Data Analyst Intern

2016

Language **English - C1 level**

Education **The Corvinus University of Budapest**

BSc in Business Information Systems - 2017

Hobbies

I mostly enjoy outdoor activities, like hiking and sightseeing. I am a beginner but avid tennis player. In the winter, I usually hit the slopes and further sharpen my snowboarding skills.

On vacation I like to travel to historical sights as well as ancient and medieval cities.
