

Tamas Siklosi

BI Developer

tamassiklosi@outlook.com

Profile

As of now, I have almost 5 years of BI development under my belt. I have worked with many different clients, developing solutions and solving problems in Microsoft Power BI, Tableau and TIBCO's Spotfire across different business domains.

For me, business data is always intriguing. I made good use of my financial and data analysis knowledge on my previous projects, since I am investing in international stocks for over 12 years.

Design is part of my job, I focus on delivering a look and feel for the product that drives the attention to the key areas. I keep up with recent technologies and trends.

Skills			
	BI Front-End	ETL	Data Science & Engineering
	I've focused on Microsoft's Power BI for the past 2.5 years, including its ecosystem, administration and customization. I strongly believe this tool has the greatest potential.	I have adequate experience in report automation from relational databases and DWs. I'm familiar both on-premises and cloud platforms with Hadoop and Azure.	When my time allows I continue my demo projects, experimenting with Python. The areas which I'm most interested in are Web Scraping, Custom Visualizations and Predictive Analytics.

Tools	Power BI	T-SQL	Pandas
	Tableau	Azure Data Factory	Scrapy
	Spotfire	Azure Databricks	Matplotlib

Other Skills	DAX	Agile Development	CSS
	Power Query	Git	d3

Business Domains	eCommerce	Wealth Management	Insurance
	FMCG	Retail	Finance

Career History

EPAM Systems - Senior BI Developer

4+ years, senior since July 2021

BI development, Data Analysis and Consultancy are my main focus areas with the above-mentioned BI tools, with additional ETL and Front-End development. EPAM's company culture helps me to gain experience with the latest technologies and use them on various projects.

My position allows me to work on-site.

Morgan Stanley - Data Analyst

6 months

Delivering automated and ad-hoc reporting on incoming and internal metrics, based on requests from the senior management or other teams.

GE Healthcare - Data Analyst Intern

1 year

Project management support, database management, trend analysis, communication with both vendors and users. Our team's responsibility was to find ways to reduce telecommunication expenses within GE Healthcare.

Language **English - C1 level**

Education **The Corvinus University of Budapest**

BSc in Business Information Systems - 2017

Hobbies I mostly enjoy outdoor activities, like hiking and sightseeing. I am a beginner but avid tennis player. In the winter, I usually hit the slopes and further sharpen my snowboarding skills.

On vacation I like to travel to historical sights as well as ancient and medieval cities.
